THANATPAT PROMTHONG (ธนัทภัทร พรหมทอง)

Experience Designer Intern

Location: 168/10 Chalong Krung 1 Alley, Lat Krabang, Bangkok 10520 **Phone:** 096-876-5392 **Email:** tawaninm13@gmail.com

Portfolio: porfolio-website-five-inky.vercel.app **LinkedIn:** linkedin.com/in/thanatpat-promthong **GitHub:** github.com/tawaninm

Availability: Full-time internship, 5 days/week, 1 Apr – 30 Jun 2027

SUMMARY

Third-year Information Technology student at King Mongkut's Institute of Technology Ladkrabang (KMITL), focused on **experience design, design systems and design-to-development handoff**. During my UX internship at Gumon Technology, I worked with my mentor on the UI redesign of MonsTask, a productivity workspace app, wrote the UX/UI requirement document for the Business Analyst, and set up the token structure for the company's first design system. I present user flows, user journeys and phased work plans to BA and development teams, and I know enough front-end code (React, Next.js, CSS) to discuss how design tokens move from Figma into code. Leading workshops for 100+ participants and working as a teaching assistant taught me to explain ideas clearly to different audiences.

User Flow & Journey Design
User flows, user journeys, information architecture and customer journey mapping to align users, BA, developers and business goals.

UI Design & Prototyping
Wireframes, high-fidelity UI and interactive prototypes in Figma; visual assets in Photoshop and Illustrator.

Design Systems & Handoff
Token structure (Brand / Alias / Mapped / Responsive), component guidelines and the Figma-to-code token workflow.

Communication & Facilitation
Presenting design rationale to BA and developers, workshop project head (100+ attendees), OOP teaching assistant.

UX EXPERIENCE

User Experience Designer Intern | Gumon Technology — Jun 1 – Aug 30, 2026

Figma • User Flow • User Journey • UI Redesign • UX/UI Requirements • Design Tokens • View Case Study

- **MonsTask UI Redesign:** Redesigned the UI of MonsTask, a productivity workspace app, together with my mentor, and wrote the UX/UI requirement document (V1 to V2) for the Business Analyst.
- **User Flow, Journey & Work Phases:** Proposed user flows, user journeys and a phased work plan in review sessions with the BA and developers.
- **Design System Foundation:** Set up the base of Gumon's first design system: a 4-tier token structure (Brand, Alias, Mapped, Responsive) with **121 tokens**, a **22-component** MVP roadmap and a **16-page** Figma file structure.
- **Design-to-Code Handoff:** Discussed with developers which tech stack to use for exporting design tokens from Figma into code.

DESIGN & PRODUCT PROJECTS

HybriCareer AI (BridgeAI) — Career Transition Platform Proposal — Generation Thailand 2026

Top 10 Finalist Proposal • User Interviews • Problem Framing • Figma • Prototype (Lovable)

- **User Research & Problem Framing:** Reviewed National Statistical Office (NSO) labor data (34% youth unemployment) and interviewed 5 career switchers and 2 HR managers to find where applicant screening breaks down in current ATS software.
- **Concept & Prototype:** Designed and prototyped a Skill-Proof Radar that scores transferable skills from portfolio work; the proposal was selected as a **Top 10 Finalist (5th Reserve)** nationwide.

NOSE TEA 'Sip to Scale' — Customer Journey Redesign & Business Case — Business Case Comp 2026

Customer Journey Mapping • SCQ Framework • Break-Even Modeling • LINE OA

- **Queue Journey Redesign:** Mapped the in-store queue journey of a cheese tea brand and redesigned it with an e-Queue and LINE OA loyalty steps so waiting time becomes in-store engagement; the plan targeted 15,000+ new digital members.
- **Business Case:** Built a 30-day growth plan within a ฿500,000 budget, with a financial model projecting ฿1.8M revenue and break-even at 7,576 cups (week 3).

Red Bull Racing F1 — Interactive 3D Web Experience — Personal Project

Three.js • GSAP ScrollTrigger • Google Veo • HTML/CSS/JavaScript

- Designed and built a scroll-driven 3D showcase with an exploded view of the car and parallax camera movement.

Technical Projects — TAWAN-OS & Disney Lorcana PlayLab — 2025 – Present

- **TAWAN-OS:** Personal multi-agent AI workspace that connects CLI agents and MCP servers (including Figma) for research, documentation and verification tasks.
- **Disney Lorcana PlayLab:** Real-time multiplayer card game on AWS Serverless (WebSockets, Lambda, DynamoDB) with Playwright E2E tests that include OWASP Top 10 checks.

LEADERSHIP & TEACHING

Teaching Assistant — Object-Oriented Programming (Java) | School of IT, KMITL Nov 2025 – Present

- Review weekly code submissions and give 1-on-1 feedback to 100+ first-year IT students on OOP principles and debugging.
- Run weekly Q&A sessions that explain software design patterns with simple mental models.

Project Head — Multimedia Roblox Journey Workshop | KMITL IT Openhouse 2025 Nov 28 – 29, 2025

- Designed the curriculum for a 2-day Lua coding workshop and presented the syllabus to faculty to get approval and lab resources.
- Recruited, trained and led 10+ Teaching Assistants and Technical Directors for 100+ high school participants.

Head of Game Workshop (Unreal Engine) | ITCAMP 22, School of IT, KMITL Apr 29 – May 2, 2026

- Designed the Unreal Engine game development curriculum for high school participants and trained the TA and TD team who ran it.

Part-time Technical Instructor | Code Genius EmQuartier & Login-Engineering Academy Sep 2024 – Present

Scratch • Micro:bit • Python • Godot Engine

- Teach students from primary to high school level, adjusting lesson pace and explanations to each student in Thai and English.

EDUCATION & HONORS

Bachelor of Science in Information Technology (Third-Year Student) | KMITL Aug 2024 – Present

Module: **Multimedia & Game Development** | School of Information Technology, King Mongkut's Institute of Technology Ladkrabang

- **Relevant Coursework:** Human Interface Design, Web Development, Computer Graphics, Object-Oriented Programming (Java), Cloud Computing, Database Systems.
- **Academic Projects:** *Drive@KMITL* (FastAPI/Next.js WebSocket real-time chat), *VPS-Tycoon* (JavaFX OOP simulation), *Synchro* (ESP32 rhythm controller).

Honors & Certifications:

- **Google Student Ambassador Thailand (2026)**
- **Top 10 Finalist Proposal:** Generation Thailand Hackathon 2026 (HybriCareer AI / BridgeAI).
- **Business Case Competitor:** NOSE TEA 'Sip to Scale' Marketing Case Competition 2026.
- **LINE Developers University Workshop 2025:** Hands-on training in chatbot design with Dialogflow and the LINE Messaging API.
- **National Software Contest:** Final Round Finalist (NSC 2022 - Detect-Cheat) & Second Round Finalist (NSC 2023 - Criminal Minds).

SKILLS

Experience Design: User Flow, User Journey, Information Architecture, Wireframing, Interactive Prototyping, User Interviews, Usability Testing, UX Writing, WCAG Accessibility, Apple HIG

Design Tools: Figma (Auto Layout, Variables, Components), FigJam, Adobe Photoshop, Adobe Illustrator, Canva

Design Systems & Front-end: Design Tokens, Component Guidelines, HTML/CSS, Tailwind CSS, React, Next.js, TypeScript, Git/GitHub

Collaboration & Strategy: Stakeholder Presentation, Requirement Discussions with BA and Developers, Customer Journey Mapping (O2O), SCQ Problem Framing, Agile Sprint Planning

AI & Automation: Claude Code, Model Context Protocol (MCP), Prompt Engineering, Python Scripting

Languages: Thai (Native), English (Professional Working Proficiency), Japanese (Beginner)
