PROFESSIONAL SUMMARY

Third-year Information Technology student at KMITL bridging **Business Strategy, Process Automation, and AI/LLM Engineering**. Proven ability to translate ambiguous operational friction into scalable automated systems—from architecting autonomous agentic harnesses and API integrations to building data intelligence workflows. Top 10 Finalist in national innovation hackathons and business case competitions with strong quantitative modeling and stakeholder presentation skills. Alumnus of the **LINE Developers University Workshop 2025** with practical experience in Dialogflow and LINE Messaging API ecosystems.

STRATEGIC PROJECTS: AI, AUTOMATION & INTELLIGENCE

TAWAN-OS — Autonomous Agentic Workflow & Intelligence Harness | [Python, TypeScript, MCP, LLM APIs](#) 2025 – Present

- Workflow Automation Engine:** Architected a multi-agent orchestration harness connecting CLI tools and custom Model Context Protocol (MCP) bridges, automating multi-step research synthesis, document OCR, and diagnostic validation loops to eliminate repetitive manual workflows.
- Signal Extraction & Noise Filtering:** Implemented structured LLM pipelines that ingest heterogeneous data sources (transcripts, APIs, web docs), categorize core strategic insights, and compile persistent markdown knowledge bases with automated verification guardrails.

NOSE TEA 'Sip to Scale' — Business Strategy & O2O Process Design | [SCQ Framework, Financial Modeling](#) Business Case Comp 2026

- Red Ocean Strategy & Financial Model:** Structured a 30-day celebrity-free O2O growth campaign under a ฿500k budget; engineered a financial model forecasting ฿1.8M revenue (ROI 260%, GP Margin 55%) with break-even at 7,576 cups (Week 3).
- Queue Bottleneck Redesign:** Mapped end-to-end customer journeys integrating POS smart e-Queues and LINE OA digital loyalty rituals, converting in-store queue congestion into an engaging brand theater capturing 15,000+ member leads.

HybriCareer AI (BridgeAI) — AI Labor Market Intelligence & SaaS Proposal | [Top 10 Finalist Proposal](#) Generation Thailand 2026

- Market Data Discovery:** Synthesized NSO labor statistics (34% youth unemployment baseline) and conducted in-depth qualitative interviews with 5 career switchers and 2 HR managers to isolate systemic screening bottlenecks in traditional ATS degree filters.
- AI Benchmark Radar:** Designed an interactive prototype featuring an AI Skill-Proof Radar that quantifies transferable skills from actual work samples, successfully pitching the solution to secure a [Top 10 Finalist Proposal](#) award.

Disney Lorcana PlayLab — Cloud Serverless TCG Platform | [AWS Serverless, DynamoDB, Playwright E2E](#) 2025 – 2026

- Serverless Architecture:** Built a real-time multiplayer system on AWS API Gateway WebSockets and DynamoDB Single-Table Design (<100ms sync) with \$0.00 infrastructure cost under AWS Free Tier; automated full-lifecycle E2E testing for security compliance.

PROFESSIONAL EXPERIENCE & LEADERSHIP

User Experience Designer Intern | [Gumon Technology](#) Jun – Aug 2026

- Design System Architecture:** Managed and enhanced Gumon's design system by organizing UI foundations, reusable components, style tokens, and documentation, ensuring product design consistency and streamlining designer-developer collaboration.

Teaching Assistant — Object-Oriented Programming (Java) | [School of IT, KMITL](#) Nov 2025 – Present

- Instructional Mentorship:** Evaluated weekly code and delivered structured feedback for 100+ IT students; hosted Q&A clinics bridging professor intent to streamline lab progression.

Project Head — Multimedia Roblox Journey Workshop | [KMITL IT Openhouse 2025](#) Nov 2025

- Project Leadership:** Authored curriculum, pitched modules to faculty executives for sponsorship, and coordinated 10+ TAs/TDs guiding 100+ high school participants.

EDUCATION & CREDENTIALS

Bachelor of Science in Information Technology (Third-Year Student) | [KMITL](#) Aug 2024 – Present

Module: **Multimedia & Game Development** | School of Information Technology, King Mongkut's Institute of Technology Ladkrabang

- Relevant Coursework:** Human Interface Design, Object-Oriented Programming (Java), Cloud Computing, Web Development, Databases.
- LINE Ecosystem Credential:** [LINE Developers University Workshop 2025](#) — Completed hands-on training in conversational chatbot architecture utilizing Dialogflow NLP and the LINE Messaging API.
- Competition Honors:** Final Round Finalist, National Software Contest (NSC 2022) & Second Round Finalist (NSC 2023).

SKILLS & STRATEGIC TOOLING

Strategy & Project Execution: Business Case Structuring (SCQ), Financial Break-Even Modeling, User Research & Interviews, Customer Journey Mapping, Agile / Sprint Planning, Stakeholder Presentations, Problem Framing

AI & Process Automation: Multi-Agent Orchestration, LLM Prompt Engineering & Evals, Model Context Protocol (MCP), LINE Messaging API & Dialogflow, Python Scripting, Web Scraping, Structured JSON/Markdown Pipelines

Software & Cloud Tech: Python, TypeScript, JavaScript, Java (OOP), C#, Next.js, React, Tailwind CSS, FastAPI, WebSockets, SQL, Git/GitHub CI, AWS (Lambda, API Gateway, DynamoDB, S3), Playwright E2E, Docker

Languages & Soft Skills: Thai (Native), English (Professional Working Proficiency / Fluent), Cross-Functional Collaboration, Fast Independent Learner
