

EXECUTIVE SUMMARY

Third-year Information Technology student at King Mongkut's Institute of Technology Ladkrabang (KMITL) operating at the intersection of **Corporate Strategy, Process Automation, and Applied AI Engineering**. Proven capability in architecting end-to-end autonomous agentic harnesses, LLM signal extraction pipelines, and automated business workflows, alongside award-winning case competition and hackathon pitches (Generation Thailand Hackathon Top 10 Finalist Proposal, Nose Tea Business Case Competition). Combines technical proficiency in Python, APIs, and cloud services with structured problem framing (SCQ), financial break-even modeling, and cross-functional leadership. Alumnus of the **LINE Developers University Workshop 2025** with practical experience building conversational bot architectures with Dialogflow and the LINE Messaging API.

Strategic Problem Solving & Modeling SCQ framework, financial feasibility modeling, break-even projections, O2O customer journey redesign, and data-backed pitching.	Autonomous Process Automation Agentic loop engineering, Model Context Protocol (MCP), API integrations, and Python automation eliminating operational friction.
AI Trend Intelligence & Data Signals Multi-source knowledge indexing, prompt engineering & evals, unstructured data extraction, and signal-to-noise filtering.	Cross-Functional Leadership OOP teaching assistant, workshop project head (100+ attendees), technical translation between engineers and business leaders.

STRATEGIC PROJECTS: AI, AUTOMATION & PLATFORM ARCHITECTURE

TAWAN-OS — Autonomous Agentic Automation & Trend Intelligence Harness 2025 – Present
Python • TypeScript • Model Context Protocol (MCP) • Multi-Agent Orchestration • LLM Evals

- Workflow Automation Engine:** Architected an autonomous multi-agent orchestration harness linking CLI proxies and custom MCP connectors, automating multi-step document research, meeting synthesis, code diagnostics, and verification loops to eliminate repetitive manual workflows.
- Signal Extraction & Trend Synthesis:** Designed structured LLM ingestion pipelines that extract, categorize, and cross-reference signals from heterogeneous inputs (video transcripts, market reports, and documentation) into searchable, durable markdown repositories.
- Deterministic Verification Guardrails:** Implemented automated health checks and verification suites (Doctor QA engines, schema linters) to prevent LLM hallucinations, ensuring reliable data formatting and persistent state tracking across long-running tasks.

NOSE TEA 'Sip to Scale' — Corporate Strategy, Financial Modeling & O2O Redesign Business Case Comp 2026
SCQ Framework • Financial Break-Even Modeling • Customer Journey Mapping • Booku POS • LINE OA

- Red Ocean Strategy & Feasibility:** Formulated an intensive 30-day celebrity-free O2O growth strategy under a strict \$500,000 budget constraint for a premium cheese tea brand facing store congestion and declining organic social reach.
- Quantitative Financial Projections:** Built a comprehensive financial model forecasting \$1.8M revenue, ROI of 260%, and 55% store GP margin, with break-even verified at 7,576 cups (Week 3) based on unit economics and ingredient cost structures.
- Queue Bottleneck Transformation:** Redesigned customer journeys by integrating smart e-Queues and LINE OA digital loyalty rituals, converting idle in-store wait times into interactive UGC engagement stations and onboarding 15,000+ new digital members.

HybriCareer AI (BridgeAI) — AI Labor Market Intelligence & SaaS Proposal Generation Thailand 2026
Top 10 Finalist Proposal • User Research • Labor Analytics • AI Radar Prototyping • Lovable

- Market Discovery & Problem Framing:** Analyzed National Statistical Office (NSO) labor data highlighting a 34% youth unemployment rate; conducted qualitative interviews with 5 career switchers and 2 HR managers to pinpoint screening friction in legacy ATS software.
- AI Benchmark Prototyping:** Conceptualized and prototyped an interactive AI Skill-Proof Benchmark Radar that quantifies transferable skills from real portfolio deliverables, successfully pitching the solution to earn selection as a **Top 10 Finalist Proposal (5th Reserve)** nationwide.

Disney Lorcana PlayLab — Cloud Serverless Real-Time Gaming Platform 2025 – 2026
AWS API Gateway (WebSockets) • AWS Lambda • Amazon DynamoDB • Playwright E2E • OWASP Security

- Serverless Architecture & Cost Efficiency:** Designed a full-stack real-time multiplayer platform on AWS Serverless with <100ms WebSocket synchronization and DynamoDB Single-Table Design, achieving zero-cost (\$0.00) infrastructure overhead under AWS Free Tier.
- Automated Testing & Security Compliance:** Engineered automated Playwright E2E regression test suites and verified security integrity under the OWASP Top 10 framework, ensuring robust fault tolerance during concurrent network drops.

PROFESSIONAL EXPERIENCE & LEADERSHIP

User Experience Designer Intern | Gumon Technology Jun 1 – Aug 30, 2026

- **Design System Management & Optimization:** Managed and enhanced the centralized design system for Gumon Technology by organizing UI foundations, reusable components, style tokens, and design guidelines to enforce product-wide consistency.
- **Cross-Functional Collaboration:** Authored comprehensive component documentation to bridge the design-to-development workflow, facilitating smoother collaboration between product designers and engineering teams.

Teaching Assistant — Object-Oriented Programming (Java) | School of IT, KMITL Nov 2025 – Present

- **Stakeholder Communication & Mentorship:** Evaluated weekly code implementations and delivered structured 1-on-1 feedback for 100+ first-year IT students, reinforcing clean code standards, OOP principles (Polymorphism, Encapsulation), and systematic debugging.
- **Instructional Bridge & Process Improvement:** Organized and led weekly conceptual Q&A clinics, translating abstract software design patterns into intuitive mental models and eliminating lab blocker bottlenecks between professors and students.

Project Head — Multimedia Roblox Journey Workshop | KMITL IT Openhouse 2025 Nov 28 – 29, 2025

- **Project & Curriculum Leadership:** Spearheaded the end-to-end curriculum design for a 2-day interactive Lua coding program, authoring technical modules and pitching the syllabus to faculty executives to secure official sponsorship and lab resources.
- **Cross-Functional Team Management:** Recruited, trained, and supervised a team of 10+ Teaching Assistants and Technical Directors, coordinating classroom logistics, lab machine environments, and live demonstrations for 100+ high school participants.

Head of Game Workshop (Unreal Engine) | ITCAMP 22: The Auspicious Jamboree, School of IT, KMITL Apr 29 – May 2, 2026

- **Curriculum Architecture & Delivery:** Designed and structured the comprehensive Unreal Engine game development curriculum for high school participants, establishing interactive learning milestones.
- **Staff Training & Camp Operations:** Trained and mentored the cohort of TAs and TDs, managing classroom pacing, technical guidance, and operational coordination throughout the camp.

Part-time Technical Instructor & Mentor | Code Genius EmQuartier & Login-Engineering Academy Sep 2024 – Present

Tech: Scratch • Micro:bit • Python

- Instructed primary school students in coding through block-based programming (Scratch, Micro:bit) and foundational Python.
- Provided individualized learning feedback and adapted lesson pacing to fit student progress in both Thai and English.

EDUCATION & KEY HONORS

Bachelor of Science in Information Technology (Third-Year Student) | KMITL Aug 2024 – Present

Module: **Multimedia & Game Development** | School of Information Technology, King Mongkut's Institute of Technology Ladkrabang

- **Relevant Coursework:** Human Interface Design, Object-Oriented Programming (Java), Cloud Computing, Web Development, Computer Graphics, Database Systems.
- **Academic Projects:** *Drive@KMITL* (FastAPI/Next.js WebSocket real-time chat), *VPS-Tycoon* (JavaFX OOP simulation), *Synchro* (ESP32/Hardware rhythm controller).

Extracurricular Honors & Corporate Certifications:

- **LINE Developers University Workshop 2025:** Completed hands-on training in conversational chatbot architecture with Dialogflow NLP and the LINE Messaging API.
- **Top 10 Finalist Proposal:** Generation Thailand Hackathon 2026 (HybriCareer AI / BridgeAI).
- **Business Case Competitor:** NOSE TEA 'Sip to Scale' Marketing Case Competition 2026 (Team อาโหรรยจริงจกรับพี่น้อง).
- **National Software Contest:** Final Round Finalist (NSC 2022 - Detect-Cheat) & Second Round Finalist (NSC 2023 - Criminal Minds).

STRATEGIC & TECHNICAL CAPABILITIES

Strategy & Problem Framing: Business Case Structuring (SCQ), Financial Break-Even & Unit Economics Modeling, Market & Trend Research, Customer Journey Mapping (O2O), Stakeholder Pitching & Presentation, Agile Sprint Planning

AI & Workflow Automation: Multi-Agent Orchestration, Model Context Protocol (MCP), LLM Prompt Engineering & Evaluation, LINE Messaging API, Dialogflow NLP, Python Scripting, Web Scraping, Structured JSON/Markdown Pipelines

Software & Cloud Infrastructure: Python, TypeScript, JavaScript, Java (OOP), C#, Next.js, React, Tailwind CSS, FastAPI, WebSockets, SQL, Git/GitHub CI, AWS (Lambda, API Gateway, DynamoDB, S3), Playwright E2E, Docker

UX/UI & Rapid Prototyping: Figma, FigJam, User Interviews, Usability Testing, Apple HIG, Information Architecture, Adobe Illustrator, Canva

Languages: Thai (Native), English (Professional Working Proficiency / Fluent), Japanese (Beginner)
